

Future Medicinal Chemistry

ISSN 1756-8919

Highlights in this issue

Editorial | S Sahni, S Krishan & DR Richardson

NDRG1 as a molecular target to inhibit the epithelial–mesenchymal transition: the case for developing inhibitors of metastasis

Research Article | M Celegato *et al.*

Preclinical activity of multiple-target gold(III)-dithiocarbamate peptidomimetics in prostate cancer cells and xenografts

Review | X Zhang *et al.*

Focused chemical libraries – design and enrichment: an example of protein–protein interaction chemical space
