

Erratum

Erratum to ‘Horizontal and vertical Simon effect:  
different underlying mechanisms?’  
[Cognition 96 (2005) B33–43]<sup>☆</sup>

Antonino Vallesi, Daniela Mapelli, Sami Schiff,  
Piero Amodio, Carlo Umilta\*

*Dipartimento di Psicologia Generale, Universita di Padova, via Venezia 8, 35131 Padova, Italy*

---

The publisher regrets that in the publishing of the above article, the formula for calculating the Lateralized Readiness Potential contained a mistake (p. B37, line 2). The formula should read as follows:

$$[(C3 - C4) \text{ right hand} - (C3 - C4) \text{ left hand}]/2$$

To be coherent with the text and the figures, the formula should be:

$$[(C3 - C4) \text{ left hand} - (C3 - C4) \text{ right hand}]/2$$

We apologise for any embarrassment caused to the authors due to the above error.
